## DETAILED ACTION

### *Election/Restrictions*

1. Claims 149 and 169 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 28, 2005. Examiner would like to remind Applicants, during formal examination, any claim(s) which does/do not read on the elected embodiment of fig. 3B would be withdrawn from further consideration.

Furthermore, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 129-133, drawn to method of fabricating a passivation layer, classified in class 438, subclass 770.
  - II. Claims 134-142, 144-148, 150-168, 170-191 drawn to method of fabricating field-effect transistor, classified in class 438, subclass 167.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because ONO passivation layer does not necessarily require annealing an oxide layer in

a NO environment. The subcombination has separate utility such as field-effect transistor with just a nitride passivation layer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Sefer whose telephone number is (571) 272-1921.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915.
